DETAILED ACTION

Applicant's election with traverse of Group II (claims 2,14,16,17) in the reply filed on 3/14/06 is acknowledged. Applicant's arguments are found persuasive and the previous restriction requirement has been withdrawn.

Claim Objections

Claims 1-17 are objected to because of the following informalities: The claims contain various examples of grammatically awkward phrases. Applicant is urged to carefully review all the claims however some examples are as follows. In claim 1 lines 6-7, "debris achieved thereto". In claim 14 lines 5-6 the phrase "beings rotatable". In claim 15 lines 14-15, being rotate in the opposite direction". Additionally, concerning claim 2, the claimed covering appears to be positioned above the tilling element as shown in figure 11, not below the tilling element as claimed. Furthermore, concerning claim 2, there does not appear to be a cleaning step recited in the claim, which is reflective of the "method of cleaning" set forth in the preamble. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

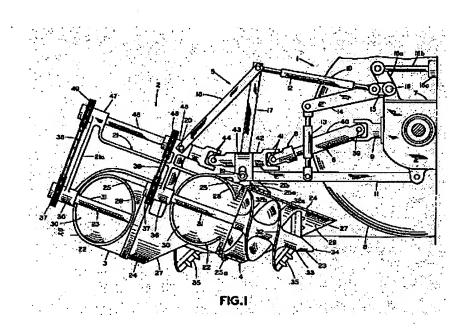

Claims 2, 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Tomik (3,714,990).

Application/Control Number: 10/508,919

Art Unit: 3671

Tomik discloses a traveling rolling digger including a drilling shaft having at least one drilling or tilling blade rotatable by a drive mechanism about a longitudinal shaft axis, with a non-axially rotating covering sleeve 24 as shown in figures 1 & 3.

Concerning claim 2, given the structure of Tomik, the claimed method steps would inherently be performed.

Allowable Subject Matter

Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1,3-13,15 are allowed.

Art Unit: 3671

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (571) 272-6987. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Will can be reached on (571) 272-6998. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
